# What is the e-mark?

reddot award 2019  
honourable mention

The e-mark is an electronic mobile marking device to create and change own imprints by using an App on a mobile device or PC and print them by an easy sideways movement in full colour.

The software allows you to create any kind of imprint, including logos, texts, pictures, date, time, numbers and much more.

With only few clicks in the App, an imprint is sent to the e-mark, which is ready to be used immediately.

### **Compact & mobile**

Easily use the e-mark on the go. Thanks to its inbuilt rechargeable battery, it can be used wherever needed – be it in the office, the garden or on your next business trip. Store up to four imprints permanently on your e-mark and use it without software. Change imprints by tapping onto the e-mark.

e-mark

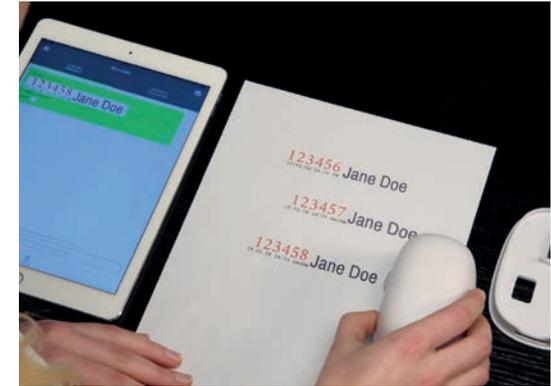

### Individual and flexible

Create and change imprints easily with personal data and images using the COLOP e-mark App. It is available either for iOS or Android mobile devices such as mobile phone or tablets via WIFI and even for windows PCs via USB.

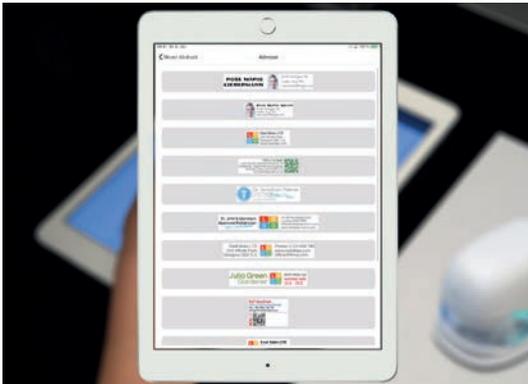

### Colourful imprints

A tricolour ink cartridge allows your imprints to be in full colour range. Give your creativity free reign to design your next imprints and add logos and images in real colour.

### One-for-all functionality

Add automatic date, time and numbering to your imprints to simplify daily office life. Generate barcodes and QR-codes directly in the App.

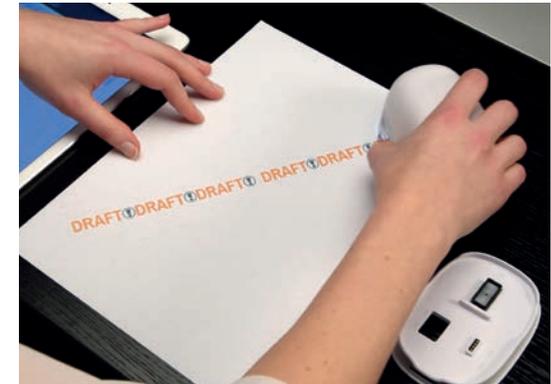

### Ready-to-use templates

Choose an imprint from the comprehensive set of templates stored in the App for ease of use.

### Mark any absorbent surfaces

Mark directly on paper, cardboard, certain wood, carton, books, paper bags or use COLOP label sheets for use on plastics, metal, glass and other non-absorbent materials.

### Special imprints

Mark imprints with up to 150mm or use the repeated marking function for even longer imprints. Use a two- or three-line imprint when needing higher imprints.

**OFFICE MANAGEMENT**

**QUALITY MANAGEMENT**

# Office and organisational tool

Use the e-mark in your office as a practical tool for organising, processing, or replacing many different stamps.

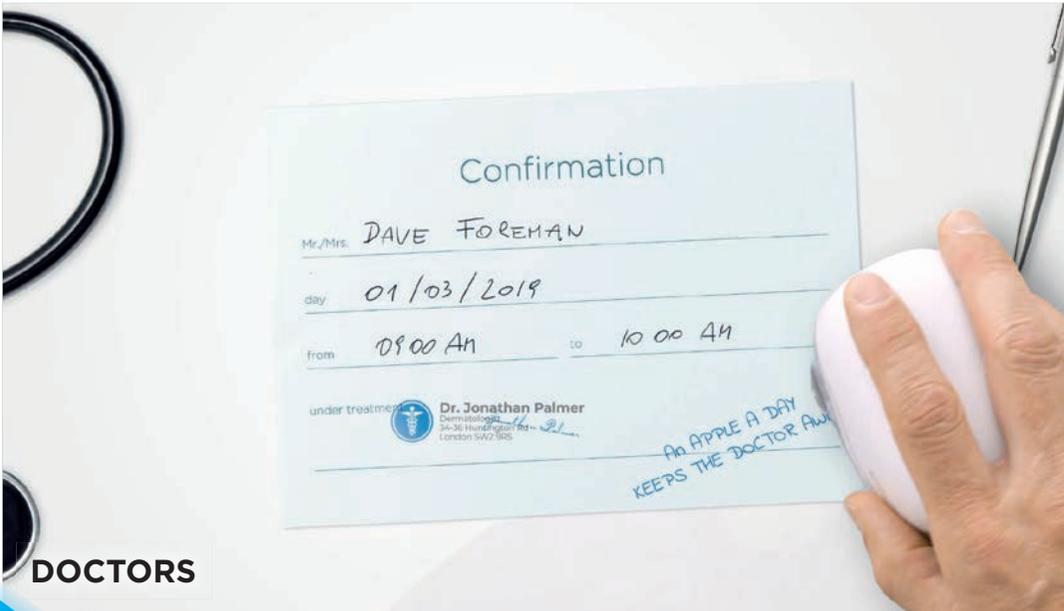

Mark documents or product packaging with clear and precise information using the automatic date and time functionality combined with easy to edit additional data.

**AUTOMATIC NUMBERING**

**LOGISTICS**

**DOCTORS**

**CONSTRUCTION INDUSTRY**

# Personalisation and marketing tool

Surprise your customers, colleagues, family and friends by leaving nice and funny messages for them.

Benefit from its mobility and flexibility of the e-mark and use it as marketing tool or at events.

Show that you are innovative and future-oriented!
